

Click™ Portal for Conflict of Interest (COI)

Configurable Software to Manage Potential Conflicts

Increase institutional compliance and streamline disclosure processes with an electronic centralized COI management system that eliminates duplicate data entry. Integrate annual disclosure data with related research business processes such as IRB studies and funding proposals. Easily reconfigure the system as internal processes change or new regulations are issued, such as the 2011 DHHS Final Rule.

Click™ Portal for COI provides a comprehensive solution for all types of disclosures, managing both individual and institutional conflicts. The software supports three primary disclosure models – transactional, annual certification, and research specific. And it simplifies the creation and tracking of conflict management plans. Multiple levels of security ensure that protected health information (PHI) is properly safeguarded.

Only Click™ Portal

- Is helping more than 20 leading research institutions manage their COI compliance efforts
- Supports transactional, annual certification, and research related disclosures
- Enables sharing best practices via the industry's most active user group

Click™ COI Features

Benefits

Streamlined disclosure forms

Eliminates redundant data input—a major irritant and a primary deterrent to COI compliance

Automated workflow

- Ensures consistent processes
- Adapts to your threshold triggers
- Eliminates delays and lost disclosures

Early flagging of potential conflicts

- Reduces the risk of noncompliance
- Fosters a culture of transparency

Electronic reminders

Automatic notification and escalation

Public disclosure

Easily generates data required for public disclosure (via web or email)

IRB, IACUC, and Grants process integration

Connects COI data to study and funding proposals

Management plan templates

Reduces time required to create plans

Institutional COI support

Simplifies identification, tracking, and management of institutional relationships that could create conflicts

Configurable application architecture

Easily tailored to your disclosure needs
